LIVE STOCK REVIEW.

The Week's Outcome at the East Liberty Yards Shows Improvement.

MARKETS ARE GENERALLY BETTER

Supply of Cattle, Sheep and Swine Palls Below the Demand.

PRICES TENDING STEADILY UPWARD

OFFICE OF PITTSBURG DISPATCH, WEDNESDAY, March 19, 1890.

The tone of markets at the East Liberty yards shows improvement all along the line this week. Supply was not up to demand for good stock.

Cattle receipts were in all about 70 loads. against 75 last week and 90 the previous week. There were no strictly prime cattle in the offerings this week. The best offered were fair to good butcher stock, and the highest price obtained was \$4 70 to \$1 75, which was an advance of 5c to 10c per cwt over last week's prices for the same grade. Primes would have found ready sale at 5c per b and over. Markets opened active and strong on Monday morning and have not relaxed their grip as the week progresses and additional receipts are offered.

This morning a few loads which were among the arrivals were as firmly held at the advance as those sold on Monday. The run of fresh cows was light, and the range of markets was \$30 to \$40 per head. Very few brought the lat-ter figure. The bulk of the offerings was common stock. The run of calves was only fair, and markets were 1/2 per h higher than a and markets were ½c per m higher than a week ago. The attendance of buvers was a full arerage. Two loads of light butcher cattle, areraging about 900 ms, were bought by a Washington county farmer, for feeding purposes, at prices which were not ascertained. There have been scarcely any stockers and feeders coming to the Liberty Yards for the past few weeks.

Sheep, Lambs and Swine

Markets for sheep and lambs have been very active all the week at an advance of 25c per cwt on last week's prices for choice native wethers and also for lambs. Western sheep have not shared in the upward movement, but are firm at old prices. The latter, it seems, do not come to our markets in as good condition as the nearby stock. The best native wethers sold and the bearing stock. The best marks we help sold as 18:23, and a few bunches of very choice lambs were sold as a fraction over 7c per 2b. Choice grades of sheep and lambs have been in very scant supply for some weeks past. While supply is increasing demand is more than keeping pace with supply.

nace with supply.

The upward movement in live porkers, which started a week ago, has been fully sustained. Tops were active on Monday at \$4.00, which was an advance of 20e per cut on prices of the previous Monday. Tuesday is the great day for nearby porkers, which are fully 10c below Chicagos in value. Notwithstanding quality of receipts was lowered vesterday, markets were well sustained at \$4.50 to \$4.55 for the nearby stock which would be sequivalent to nearby stock, which would be equivalent to \$4.60 for Chicagos. There were on the market some four or five loads this morning, and all signs pointed to their quick transfer. One of our leading packers was advised by his Chicago buyer this morning that the top price there was \$4.25, a drop of 15c from the highest price reached on Saturday.

Minneapolis—Receipts of wheat for the past 24 hours were 182 cars, with shipments 42 cars. Cash wheat was in active demand, with most of the local millers figuring as free buyers. The smallness of the receipts and the prospects of their being light for some time led to considerable competition among buyers, and resulted in all good samples being disposed of early in the day. Elevator people were out of the market. The general talk among elevator people indicated smaller interior shipments for some time to come. SUED FOR TRESPASS.

Damages Wanted From a Street Railway Company for Demolishing Buildings.

CHICAGO, March 19.-Warren Springer today sued Charles T. Yerkes, the West Chicago Street Railway Company, the West Chicago Street Tunnel Company, the Fitzsimmons & Connel Co., contractors, and Samuel G. Artingstall, City Engineer, in an action of trespass for \$100,000. The suit is for the defendants' action in entering upon Springer's buildings and demolishing them in order to build a tunnel under the river for the West Side Cable Com-pany. Judge Tuley yesterday decided that the action was willful trespass without excuse, and Springer now seeks to recover for damages al-ready sustained.

Outside trading was fairly well represented. A prominent local operator started as free buyer at the opening and his buying, with others following, assisted in ad-

rancing prices. The undertone was apparently rather firm, hough many operators fear the market just at present is in such a condition that prices may weaken off some more. Cable advices generally noted steady markets. The strike in Liverpool is materially tending to restrict business. Crop damage news was received from Ohio, Indiana Missouri; and Kentucky, and just about as many reports were received denying any serious

damage. Corn was dull and inactive the greater part of the session, fluctuations being narrow and easy early, but later showed a little better tone. The market opened a trifle under the closing prices of yesterday, was very tame, changing but little, and final quotations were a shade

under those of yesterday.

Trading in oats centered in May. There was liberal selling by a large operator, from whom buyers obtained all they wanted at 213/2213/c buyers obtained all they wanted at 213@213c for May. The more deferred futures were a shade higher, with very little trading.

Pork—Trading was smaller than for several days past, and chieff for May. On liberal offerings a weaker feeling was developed, and prices receded 123@15c. Later, more steadiness prevailed, and prices rallied 754@10c, but again declined 5@75c, and closed steady.

Lard—Trading was comparatively light, and the feeling was easy. Prices ruled 23c lower, and the market closed rather quiet.

SNAGS IN THE WAY OF A STOCK BOOM

A deal was about concluded yesterday evening for 16 choice lots in Allegheny City, upon each of which a \$4,000 dwelling will e erected this season.

The Thomas Fawcett residence, with about five acres of ground, on Craft avenue, Oakland, was sold for \$100,000 to D. P. Reighard, who will occupy it as a permament home.

A Fourth avenue real estate broker re-

ceived a letter yesterday from a gentleman in Cincinnati making Inquiry as to the price of property in the best business part of the city, with a view to purchasing and removing his interests to this city. It was reported yesterday that several Pitts-

burg capitalists were negotiating for a sugar plantation near New Orleans. This is probably the same deal that was referred to a few days ago. The names of the gentlemen could not be ascertained. One of them is now in Orleans.

A study of the real estate sales of the past year or two discloses the fact that, with few ex-ceptions, they were made on the basis of fair prices. The exceptions were in the cases of a few properties wanted for special purposes, the consideration being of secondary import-ance. Holders of property should bear in mind that there is a point beyond which investors will not go. Last fall several fine building sites in the East End were put on the market at a reasonable price, and a Fourth avenue banker expressed a desire to purchase the entire block. before the sale was consummated the owner thought be saw a boom coming his way. and raised his figures about 25 per cent. The banker backed out at once, and the property is still unsold. Other instances of the same character might be mentioned. Gradual appreciation as the city grows and business expands is right and reasonable, but extravagant demands with nothing but greed to rest upon, drive investors out of the market and inflict serious injury upon one of the greatest interests of the

As stated at the outset, it is easy to sell real estate at fair figures-and these represent an average advance of about 50 per cent in the last two or three years, enough, certainly, to satisfy any ordinary craving for cent per cent-but the moment fancy values are suggested buyers turn tail and either keep their money n their pockets or invest it elsewhere. So far, real estate in and around Pittsburg has been well handled, and the result has been an active market, and a rich harvest for both buyers and sellers. It is hoped this conservative policy will be continued. While there is no reason to expect a reaction in values, there is, at the same time, strong ground for deprecating a radical advance. The interests of the city as well as of individuals, will be the best subserved by maintaining, as nearly as possible, the existing order, and leaving the question of enhancement to the exigencies of demand and supply.

A drummer of long experience remarked yesrday:"A traveling man of standing and experience in any trade never speaks of his rivals exhe says nothing at all. Some of the younger embers of the fraternity, who are quick to 'catch on,' have noticed this fact, and, anxious to copy, they speak well of everything and everybody in their trade, and give merchants so much of this kind of taffy that it become sickening. The best plan for a drummer to pursue is to say nothing when he has nothing important to say."

Competition among sellers of capital has become the leading regulator of prices, controlling money much in the same way as it con-trols commodities. Pittsburg and every other large city knows the truth of this from expemultiplication of banks, and every description of loaning company or financial agent, well knowing that, other things being unchanged heir increase insures easier money and encourages enterprise. For these and other reaons Eastern capital is invited.

A Wall street special to Whitney & Steven-son says: "The professional traders do not wish to take any fixed position so far as the future of the market is concerned. They say that they see no encouragement, even with the promise of sharp railies, to load up with stocks, because as soon as any specialty makes an advance of % or 1 per cent somebody opens the bag, thus giving conclusive evidence that there will be many false starts yet before the real bull market gets under way."

The Wall street Investigator says: It is said that Mr. Frank Tack, Vice President of the Consolidated Stock and Petroleum Exchange, and a prominent petroleum commission broker, is making preparations to leave this city for Pittsburg, Pa., where he will engage in the oil producing industry. Within the last ten months, at least a dozen of the principal commission houses and traders on this Exchange have abandoned the business, including Har-vey DeWolff, Young & Stephenson, George W. Fuller, Jr., S. Morris Pryor, Joseph Craig, C. M. Eaton, A. C. Lawrence, Orvis Bros. & Co., George H. Lincoln, Livingston Roe, George W. Pitou and John C. Crevere, Dealings have declined from millions of barrels of oil daily, to an insignificant amount, and thus the Othello of the petroleum pit finds his occupation gone.

LOCAL SECURITIES. Pleasant Valley Continues Its Upward Movement-Washington Oil Comes High. Further advances in Pleasant Valley Railway,

Chartiers Gas and a bid of 85 for Washington Oil, the best for several months were the principal features of the stock market yesterday. Electric and Switch and Signal were fractionally weaker. Philadelphia Gas and the tractions were practically unchanged, with a good demand for the former. Business was slack, sales at both calls aggregating only 150

There were more buyers than sellers, which is a pretty good indication that prices are up to stay, at least until the present demand is satisfled. The earnings of Pleasant Valley are re-ported to be on the increase, and on this the advance is based. The talk yesterday morning was of 26 or 27 for it before the end of the

A MONEY MYSTERY. imali Notes Disappear Like Pouring Water

Into a Rat Hole. Scarcity of small notes was a subject of com-plaint at most of the banks yesterday. Gold was employed largely in the settlement of balances. What becomes of the currency is a mystery hard to disentangle. Said a cashier: "We have no small bills at all. They are ordered out by the \$50,000 and \$100,000 at a time, but it is like pouring water into a rat hole. They almost immediately disappear; no one knows wither."

Business was of the usual tenor. Business

men were liberal borrowers, generally at 6 per cent. The supply of funds was adequate to all purposes. Checking was off a little, but depositing was fair. Surplus accumulates. There will be plenty of cash to boom the spring trade. Exchanges were \$2.375,890 51 and balances \$44,523 50. Money on call at New York yesterday was easy, ranging from 33484 per cent; last loan, 3%; closed offered at 3%. Prime mercantile paper, 5%673%. Sterling exchange quiet but strong at \$4.82 for 60-day bitls and \$1.84 for demand.

OIL PIRM.

The Market Makes Up in Strength What It Lacks in Activity.

Petroleum was firm yesterday and dull and active by spells. The market opened at the lowest point and closed at the highest. It was bid up early by the Pittsburg shorts. The only break occurred late in the day, caused by Bradford selling. It railied in the last half bour, and held the advance till the close. Most of the selling was of long oil. The range of fluctuations was: Opening and lowest, 87%c; highest and closing, 88%c. Tuesday's clearances were

and closing, 35%C. Tuesday's treatable promise has 1,085,000 barrels.

Another well of considerable promise has been brought in in the Chartiers field, It is on the O'Brien farm, and is eight feet in the sand. It had produced about 125 barrels up to yesterday evening. The well on the Smith farm, in the same field, has increased its flow to about 150 barrels a day. the same neid, has increased its asset 250 barrels a day.

Guffy & Co.'s Free farm well at Coraopolis is completed at 20 feet in the sand, and is put down as a 15-barrel producer. It is being tubed for pumping.

E. M. Hukill's venture on the J. C. Morris farm in the Mt. Morris field is completed and will be good for 50 barrels a day. His Dave Wise No. 3 is through the first pay streak, and the Barry No. 1 is due in the pay in a few days.

The Hundred-foot Oil Company's gusher on
the Jacob Dambach farm, in the Hundred-toot

district, encountered a strong flow of salt water after being drilled in, which had the effect of cutting down its output to about 25 barrels a cutting down its output to about 25 barrels a day.

The Wood & Young well on the John Dambach farm is doing 250 barrels a day. T. W. Phillips' No. 16, on the Jacob Stamm farm at Glade run, is one bit in the sand and flowing at the rate of 240 barrels a day.

Several private individuals will commence drilling on the estate of Robert Hunter for gas or oil in a few days, and Guffy & Galley will put up a rig at Jack's run. This point will be watched with much interest by oil men, as it is supposed to be on the line of the Ivory and the Arbuckle well at Chartiers.

The oil excitement at Bellevne is at fever heat, and although that borough is two miles from the Ivory well at least \$100,000 will be sunk in holes whether oil is discovered or not.

DULL AND HEAVY.

Railroad Shares Fall Into a Rut-A Narrow Movement of Prices-Small Losses in the Majority-Bonds

Lifeless. NEW YORK, March 10 .- The stock market was dull and with a generally heavy tone during the forenoon, which gave place later in the day to a firmer feeling, and prices are left at insignificant changes from last night's figures. The usually active list all fluctuated within the narrowest limits, and the only wide move-ments were made in the specialties and were few in number. The principal influence upon the market to-day was the weakness in London, which was a reflection of the uneasiness in Berlin over the resignation of the great German Chancellor. The depression of the opening was of short

duration, and was accompanied by no activity or excitement, and the market quickly settled down into its usual dull and listless condition, the movement in prices being scarcely per-ceptible in the great majority of the list for the remainder of the day. Almost all of the news bearing upon the stock market was of a favorable nature, and the report of Chairman Faithorn that satisfactory progress had been made toward the settlement of the rate disturbances between St. Paul and the seaboard was a powerful aid to the late firmness in the market.

The opening was made at concessions from last night's figures of from ½ to ½ per cent generally, though London prices came from ½ to 1 per cent down. A few further losses were sustained, but prices soon began to rally, after which the usual dullness and stagnation ruled the list until well into the afternoon, when sugar refineries moved up on the prospect that the dividend question will be settled to-morrow. Tennessee Coal also indulged in one of its sudden movements, rising from 45 to 51 on a rumor that the differences in the management had been settled. Some other sharp movements took place in specialties, and Wheeling and Lake Erie preferred, after a decline, rose to 7L Louisville and New Albany and Chicago dropped about 5 per cent from its last previous sales and Toledo and Ohio fell off over 1 per cent.

The market as a whole was almost harren of horn that satisfactory progress had been made

Cent.
The market as a whole, was almost barren of The market as a whole, was almost barren of general features, and finally closed aboutsteady at close to first prices. The final changes show a majority of declines, which, however, are invariably for insignificant fractions, while Tennessee Coal is up 5 per cent and sugar 1½. Railroad bonds were also extremely dull, the sales of all issues reaching only \$870,000, with no special animation anywhere in the market.

The Post says: The fact that the prices of stocks were a little lower in consequence of a political event in Germany does not, however, necessarily imply that the stock market would be very seriously affected even if the worst apprehensions of the extreme conservatives should be realized. The values of these stocks and bonds are based on their dividend and interest paying prospects, and certainly these prospects have not been so good for all railroads in the United States at any time in three years as they are now.

There is an unusual abundance of capital in Europe seeking investment, and when the owners of that capital become convinced that the present prospects are rapidly materializing into a great and permanent improvement in the earning capacity of the railroads, there is likely to be a greater infinx of foreign capital for investment than has been witnessed at any time before.

BAD roads are a boon to blacksmiths. One

who lives in Homewood said yesterday that he had had more than he could do all winter putting on horseshoes that had been pulled off by the mud, and mending broken wagons. He thinks it would be unconstitutional for the State te enter upon a general system of improvement. An oil specialist remarked yesterday: "Operators are punching Western Pennsylvania full of holes without developing very big wells, or any of staying power. There is an increase of production, but it is not due to big wells, but to a multitude of small ones. I think they are stripping the territory much the same as a milkmaid strips a cow."

By Pittsburg, Christian and St. Louis, 2 cars of corn, 3 of oats, 1 of bran, By Baitimore and Ohio, 4 cars of hay, 2 of oats, 1 of cloverseed. By Pittsburg and Lake Erie, 1 car of hay, 1 of bran, 2 of malt. Ear corn is very scarce and quickly brings outside quotations. Even higher prices could have been had this morning. The late effort of Northwestern millers to advance prices of spring patent flours has proved a failure. Flour is, however, steady at the old rates.

Seasoned hemlock lumber is very difficult to find and markets are very firm. Good dry ash, cherry and walnut are also scarce and firm, The principal complaint of lumber men is concerning weather and roads. Once the weather settles and country roads become passable there is little doubt that an active demand will start up. Prospects for a large volume of trade through the year are unusually bright. NEW ADVERTISEMENTS. CURED IN ONE MONTH.

Pew persons have experienced more suffering from a diseased condition of the kidneys than has Mr. Andrew Hauser. During the day be had a constant tired feeling, and at night he was so racked with waith with ed with pain, with a burning fever he

could scarcely get any quiet sleep, for his sleep was so disturbed with frightful hideous dreams. The weak-ness and pain across the small of his back, igh colored urine, and which contained

and which contained a sediment, the frequent desire to void it, accompanied with great pain, told him but too plainly that but too plainly that advancing. The inflammation that followed produced a stricture. As he grew weaker his food failed to digest, he had beiching of gas after eating, had taste in his mouth, and coated tongue. He feit a severe pain in his right side, and sharp pains would seize him in his arms and legs. Day by day our patient sufferer continued to grow worse, until his blood became so poisoned, that an eruption of pimples and red blotches covered his whole body. Having been unable to find any relief, he had about given up in despair, when reading in the paper a testimonial of a patient who had been cured of conditions similar to his by the physicians of the Polypathic Institute, 420 Penn avenue, he called upon them, and after using their medicing—which was made to suit his case—for one called upon them, and after using their medi-cine—which was made to suit his case—for one month he became cured. He says: "I desire to state for the benefit of the public that the to state for the benefit of the public that the above statement of my case is correct in every particular. I had been suffering for over two years, and had given up all hope of ever being cured, but Dr. Shafer, of the Polypathic Medical Institute, has cured me. I have not felt as well as I now do for years.

Mr. Hauser is engaged in the manufacture of glue at fittes Station, on the West Penn. R. R., where he will be giad to further describe his case.

All forms of kidney and urinary diseases, chronic diseases and surgery successfully treated.
